Multi-Account Access Authorization Examples

The multi-account access form allows authorized members to access multiple member numbers in online banking with a single username. Refer to examples below for sample scenarios. Please contact the credit union if you need further assistance.

SAMPLE 1: A married couple wants access to each others' accounts. His accounts are 111111 and 222222; her account is 333333. Currently neither is a joint owner on the other's account. However, they would still like to be able to access all shares and make transfers* on all accounts regardless of which account they are signed into (as indicated by checking two-way access).
